Education

INDIAN INSTITUTE OF INFORMATION TECHNOLOGY BHOPAL

August 2023 – June 2027

Bachelor of Technology in Electronics & Communication Engineering

CGPA: 8.66/10

Relevant Coursework: Data Structures & Algorithms, DBMS, OOPs, Computer Network

Achievements

- 2025 Served as a Teaching Assistant for Electronic Devices and Circuits.
- 2025 Leetcode Rating -1800
- 2024 Ranked 3rd among the top 45 teams in **Hack-O-Sprint 2.0** (Internal Smart India Hackathon 2024).
- 2024 Served as Member, Head, and Design Coordinator in the IEEE student chapter.

Experience

Raizzify (Remote)

Mar 2026 – May 2026

Full Stack Developer

- **Problem Statement:** Inefficient customer communication workflows and recurring UI issues were impacting user experience, lead conversion, and development productivity.
- **Solution:** Engineered customer-facing workflow enhancements by building automated WhatsApp communication features, fixing 10+ high-impact UI issues, and streamlining frontend-backend integration to improve application stability and user experience.
- **Tools & Technologies:** JavaScript, React.js, Next.js, Git, GitHub, REST APIs, UI/UX Development, Frontend-Backend Integration, Responsive Design.

Personal Projects

AI-Powered CI/CD Debugging Platform

[web](#) | [github](#)

- **Problem Statement:** Difficulty in quickly identifying and diagnosing critical failures from large volumes of CI/CD logs.
- **Solution:** Built an autonomous AI-driven log analysis pipeline processing 1M+ CI/CD logs/day, automatically detecting critical failures and reducing troubleshooting time by 70%.
- **Tools & Technologies:** TypeScript, Node.js, Express.js, GitHub REST APIs, OpenAI API (LLMs), Webhooks, Event-Driven Architecture, MongoDB, Log Processing, CI/CD Pipelines.

Memory – Solution to your favourite Links

[web](#) | [github](#)

- **Problem Statement:** Difficulty in efficiently preserving, indexing, and retrieving relevant information from large volumes of unstructured YouTube and Twitter content.
- **Solution:** Built an AI-powered semantic retrieval platform that indexed 10K+ embeddings from YouTube and Twitter data, enabled scalable vector search with Pinecone, and reduced query latency by 30% through multi-core processing optimization.
- **Tools & Technologies:** TypeScript, Node.js, REST APIs, Pinecone (Vector Database), MongoDB, OpenAI API, Transformers (Xenova/all-MiniLM-L6-v2), Cluster Module (Node.js), Recoil.

AlgoMind: AI Coding Feedback System

[web](#) | [github](#)

- **Problem Statement:** Difficulty in identifying recurring coding mistakes and extracting actionable learning insights from past LeetCode submissions.
- **Solution:** Built an AI-powered learning analytics platform that captured user submission errors, transformed natural language queries into Neo4j graph searches using Qwen 2.5 (3B), and generated personalized, context-aware feedback to accelerate problem-solving improvement.
- **Tools & Technologies:** JavaScript, Node.js, Browser Extension APIs, Neo4j (Graph Database), Docker, Qwen 2.5 (3B LLM), REST APIs, Cypher Query Language, Event-Driven Architecture, Backend Development.

Skills

Languages: C++ , C, Python, JavaScript, TypeScript, SQL.

Backend Development: Node.js, Express.js, FastAPI, PostgreSQL, MongoDB, REST APIs, Prisma (ORM)

Frontend Development: React.js, Next.js, Redux and Recoil (State Management), Tailwindcss.

DevOps & Tools: Git/GitHub, Postman, Docker, Linux, Windows, Turborepo, CI/CD Pipelines (GitHub Actions), AWS
